Buyers Unable to Get Enough Stockers.

A light run of bogs seems to be the fule and yesterday was no exception. The Missouri river markets were all lower, but owing to the supply of hogs here be-ing much below the demand prices were pretty well maintained and the buyers claimed that their purchases yesterday cast as much as on the previous day. The bulk or perhaps all the hogs yesterday and at about steady prices. Cudahy and sold at about steady prices. Cudahy and Build each took a part of the hogs, but Sudahy got the most. It was evident that were not getting one-half as many hogs as they wanted. There does not seem to be very many if any hogs running past this market, and the light receipts are market have already been marketed. Most of the farmers and to feed wheat and they rushed their hogs off early so as to save wheat when the wheat in the bushel was worth more than the pork it would make at present prices. Cudshy hopes to get hogs enough all spring and next sum nor but the surplus for outside buyers is do not likely to be very large. The hogs that sold for six dollars yesterday were only good mixed packers.

Wheat and Corn Close Higher, Oats Lower.

Chicago, March 5 .- Speculation on the coard of trude was again dull today. Suctuations were over a narrow range and though the tone ruled firm the greater part of the day on bullish crop reports, the close showed May what and May corn only 'self-a higher, and May cats 'self-a lower, Provisions closed like to low lower. Wheat bulls had fair encouragement soon after the opening. Cables were only slightly higher, but northwestern receipts were much duced. Added to this was the builten factor of dry weather reports from the snothwest. The effect of the early builish surroundings was not felt with full force until nearly an hour after the openforce until nearly an hour after the open-ing. Trade in general was slack, but the crop conditions finally awakened buy-ers from the country. The southwestern markets were active, St. Louis advancing May prices ic. May here opened a shade lower to unchanged, at 75% to 75%25%, and gradually advanced to 75%. Shorts had covered to some extent, though many speculators paid little attention to the speculators paid little attention to the damage reports. The small receipts in the northwest started the story that the eron vield had been overesimated. Elevator stocks there were decreasing and new attempts were made that crop would be nearer 18,000,000 to 15,000,000 bushels than 20,000,000. Corn was given some support by the local bulls and prices ruled strong for a time. Duliness, however, characterized the trade in general. St Louis did some buying here and helped early and even increased receipts had little effect, as traders were confidently expecting a falling off of farmers offerings.
